OFFICIAL VIDEO PRESENTATION DOSSIER

2-TO-4 MINUTE DEMO VIDEO SCRIPT & PRESENTATION GUIDE

ANYTIME ATHLETIC (GFMMS) — 24/7 SANCTUARY

FULL SYSTEM WALKTHROUGH WITH SPOKEN VOICEOVER

Target Video Duration:	3 Minutes 30 Seconds (Flexible 2:30 – 4:00)
Demo Application URL:	http://localhost:3000
Presenter / Voiceover:	Dhruvin Patel
Total Demonstrated Scenes:	8 Structured Timed Scenes
Core Modules Covered:	Module A (Registration & Plans) & Module B (Turnstile & Classes)
Automated Audit Result:	21/21 E2E Scenarios Passing • 13/13 Jest Tests

Anytime Athletic 24/7 Platform — Engineering Project Presentation Script

Follow this script word-for-word while recording your screen for a flawless submission.

DETAILED SCENE-BY-SCENE SCRIPT

Scene 1: Introduction, Architecture & Landing Page

0:00 – 0:25 (25s)

On-Screen Action: Start at `http://localhost:3000`. Hover over the kinetic SVG crest (AF·24) in the header. Slowly scroll down to show the multi-layer parallax depth effect and live feature cards.

Spoken Voiceover: *"Hello everyone, and welcome to the demonstration of our Gym & Fitness Management System, engineered under the high-performance brand Anytime Athletic. Built on Node.js, Express, TypeScript, and PostgreSQL with Prisma ORM, this platform implements two core modules: Module A for member registration and subscription lifecycle, and Module B for biometric turnstile access control and group fitness scheduling. As you can see on our landing page, we've incorporated a multi-layer parallax depth engine and an ultra-modern athletic aesthetic with zero AI clichés or developer clutter."*

Scene 2: 1-Click Google OAuth & Session Switcher

0:25 – 0:50 (25s)

On-Screen Action: Click the "SIGN IN WITH GOOGLE" button in the header. Show the modal with 4 demo accounts. Click Alice Johnson (alice.johnson@example.com). Watch the navbar instantly update with ALICE JOHNSON (VIP) and the pinned QR pass button.

Spoken Voiceover: *"To provide a frictionless experience, we implemented 1-Click Google Authentication. Rather than typing passwords repeatedly, members and administrators can authenticate in one tap. Let's sign in as Alice Johnson, our VIP athlete. Notice how the navigation bar immediately adapts: Alice's authenticated session is active, and a dedicated 24/7 QR Pass button is pinned directly to the header."*

Scene 3: Module A — Membership Plans & Live Enrollment

0:50 – 1:20 (30s)

On-Screen Action: Click "JOIN NOW". Scroll through the 4 plan tiers (Flex, Transformation, Elite, All-Access). Complete a registration form, select CreditCard, and click "COMPLETE ENROLLMENT". Show the success modal with the generated optical QR pass.

Spoken Voiceover: *"Now let's examine Module A: Member Registration and Membership Management. We offer four distinct membership tiers with transparent entitlements. When an athlete enrolls, our payment orchestrator processes the transaction atomically: only upon confirmed payment does the membership transition to Active status. An official QR identifier is provisioned, and an automated transactional welcome packet with the entrance token is dispatched to the member's email via Gmail SMTP."*

Scene 4: 24/7 Digital QR Pass & Athlete Dossier

1:20 – 1:55 (35s)

On-Screen Action: Click " ⚡ MY 24/7 QR PASS" in header to display Alice's high-res pass (valid Oct 2027). Close modal. Click "MEMBERS". Toggle between CARDS and TABLE views. Click "DOSSIER" on Alice Johnson to display her complete tabbed timeline (Profile, Plan, Attendance History, Invoices).

Spoken Voiceover: *"Athletes can pull up their official 24/7 VIP Digital Pass anytime. It renders an ultra-crisp, high-resolution QR code that never breaks. In the Members Directory, gym owners can toggle between an interactive luxury Card view and a structured audit table. Clicking 'Dossier' on any athlete reveals their complete profile: active subscription specs, emergency contacts, historical turnstile check-ins, and settled tax invoices."*

Scene 5: Module B — Hardware Kiosk Camera & Security Guards

1:55 – 2:35 (40s)

On-Screen Action: Click "KIOSK SCANNER". Click "START LIVE CAMERA SCANNER" to activate the webcam with sweeping laser beam. Scan Alice's QR code (AF-QR-ALICE001) to hear the audio chime and see green ACCESS GRANTED. Immediately click scan again to trigger the red 60-Minute Anti-Passback rejection. Click Charlie Davis to show expired rejection.

Spoken Voiceover: *"Next is Module B: Attendance Control and Turnstile Simulation. Our kiosk features a live optical camera scanner powered by html5-qrcode. When an athlete scans their QR pass, the system synthesizes an authentic audio chime and resolves the identifier directly against PostgreSQL. Alice's active pass unlatches the turnstile and logs the timestamp. But watch what happens if someone attempts to pass the same code back to a friend: our 60-minute anti-passback rule immediately rejects the attempt with an HTTP 403 Forbidden. Similarly, expired accounts outside the 3-day grace period are safely blocked."*

Scene 6: Module B — Studio Classes & FIFO Waitlist Engine

2:35 – 3:05 (30s)

On-Screen Action: Click "CLASSES". Show studio classes with live capacity progress meters. Book an open class for instant confirmation. Click "INSPECT FIFO QUEUE" on a full class (Spinning) to show the chronological waitlist candidates and explain the 2-hour cancellation promotion rule.

Spoken Voiceover: *"Module B also manages group fitness scheduling with a real-time capacity engine. Classes display live occupancy bars and assigned trainers. When seats are open, bookings are instantly confirmed. If a class reaches full capacity, members are placed into a strict First-In, First-Out waitlist queue. If a confirmed participant cancels more than two hours prior to the session, the earliest waitlisted athlete is automatically promoted to Booked."*

Scene 7: Financial Ledger & 18% GST Invoicing

3:05 – 3:30 (25s)

On-Screen Action: Click "PAYMENTS". Show financial audit trail and transaction summary stats. Click "INVOICE" on any transaction row to open the official GST tax invoice sheet with printable breakdown.

Spoken Voiceover: *"Every financial transaction is audited in our Payments view. Owners can track total gross volume, settled fees, and payment methods. For full regulatory compliance, clicking 'Invoice' generates an official GST tax invoice calculating the 18% tax breakdown, subtotal, and unique invoice hash."*

Scene 8: Automated Verification Audit (21/21 Pass) & Wrap-up

3:30 – 3:50 (20s)

On-Screen Action: Switch to Terminal / VS Code showing the terminal output: AUDIT COMPLETE: 21 PASSED / 0 FAILED and 13/13 Jest tests passing. Conclude facing camera or over dashboard.

Spoken Voiceover: *"To ensure complete software reliability, we built an automated 21-scenario End-to-End audit suite alongside our 13-test Jest suite—both running with a 100% pass rate. From optical turnstile scanning and FIFO queues to automated GST invoicing and Google auth, Anytime Athletic delivers a rock-solid, enterprise-grade gym management solution. Thank you for watching!"*

Recording Pro-Tips:

1. Set browser zoom to 100% or 90% at 1920x1080 resolution for clean visual margins.
2. Ensure microphone volume is balanced; the synthesized camera beep will play clearly through your speakers in Scene 5.
3. Pause for 1 second after major transitions (such as turnstile unlock or invoice modal popup) to let viewers absorb the interface.
